

# Medical Design Forum

Design Strategies for Responsive Care

**February 8 – 9**

2 Full Days

**13 LU (HSW)**

This year's Medical Design Forum includes two full days of in-depth presentations, conversations and case studies focused on design strategies for responsive care. How can design professionals partner with healthcare providers and caregivers to support a more resilient healthcare system? This forum explores approaches to integrated care for behavioral health, provider initiatives for community wellness, and various research, tools, and strategies currently informing healthcare design. Sessions combine the expertise of architects, engineers, owners, providers, and caregivers.

Co-presented by **Architecture for Health Committee (AHC)**

+ Stay tuned for more AHC events April 20, June 11 and November 9, 2018.

# Small Firm Series

Management Workshops

**April 18 • July 18 • October 17**

3 Half-Days

**4 LU per session**

Specifically designed for small firm owners and architects, this 3-part interactive series will explore in-depth foundational knowledge for successful firm management. Sessions include:

- **Best Laid Plans: Business Planning**
- **Marketing and Business Development Basics**
- **Beyond Intuition: Financial Management**

+ Stay tuned for a four-part **Business of Projects** series in Fall/Winter of 2018-19 – a thorough study of a project management and leadership from conception to completion. Topics will include Project Financing and Delivery Methods, Contracts, Project Planning, Client Relationships, Construction Documentation, Construction Administration, and Project Closeout.

# Housing Design Forum

Inspiration, Innovation, Impact: The Future of Residential Design

**May 7**

1 Full Day

**8 LU (HSW)**

The annual Housing Design Forum explores design trends, regulations, practice innovations, and demographic changes that impact professionals involved in housing in the Pacific Northwest. This year's full day forum will focus on three distinct sessions: inspiration, innovation and impacts in single-family housing design, and will combine a keynote address with case study presentations and provocative dialogue. How are today's most inspired designers employing innovative performance strategies and materials, responding to site and social context, and engaging with questions about the future of housing?

# Code Series

**May 23 • June 13**

**July 25 • October 24**

4 Half-Days

**2-4 LU (HSW) per session**

Each year, code experts work with the AIA Seattle Code Committee to determine the most relevant topics to focus on in a series of short or half-day programs. This year's series will include 4 sessions, and will plan to cover topics including accessibility, assembly occupancies, foundational residential codes, and more.

## Make sure your membership is current!

Take advantage of your local benefits that AIA Seattle offers, such as over 50 classes that meet Washington State's requirements for continuing education, networking opportunities, local advocacy on behalf of the industry, access to over 15 committees, and discounts to local awards programs. We're here to support your career.

# Design for Learning Forum

K-12 Environments

**October 15**

1 Full Day

**8 LU (HSW)**

This year kicks off our first annual Design for Learning Forum, providing a deep dive into the innovations, science and sociology, opportunities, and trends impacting the design of educational environments. This year's full-day forum will explore K-12 learning environments, both formal (schools) and informal (museums, aquariums, science/technology centers, parks and playgrounds).

# Right to the City Summit

**December 10**

1 Full Day

**8 LU (HSW)**

This thought-leadership summit will bring together interdisciplinary leaders and design professionals to explore what it means to have the 'right to the city.' Who has access to our city? How is Seattle and the surrounding region impacted by, and working on, issues of displacement, affordability, inclusion, sanctuary, and safety for new and long-time residents? What is the design community's role in ensuring that our urban population – residents and workers alike – is diverse, housed, healthy, safe, and civically engaged?
